# OVP Help for Students and Teachers
## Install the Desktop Recorder on a Mac

The Desktop Recorder is a free tool to capture; webcam footage, your screen, audio and narrate slides. Add a title, trim and direct upload to My Media. Easily record in sync with a PowerPoint and combine multiple sources. As it is a desktop program it is unavailable for iPhone or iPad.

**1**   Log into *FLO* > Open *My Media*, found in the menu under your name

   Please Note: You will need session cookies enabled.
   Safari is recommended browser for downloading this program

2   Click *Add New and* Select *Desktop Recorder*
   If it is already installed it will launch otherwise follow the prompts

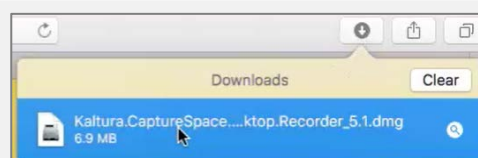

**3**   If a window about the App Store pops-up, press *Cancel.*

4   Scroll down the webpage and click *Download for Mac*

5   Open the file

6   Drag the *Kaltura CaptureSpace Desktop Recorder* icon into the *Applications* folder and authenticate.

   Note: If installing on a Flinders student computer, drag the icon to the folder labelled with your FAN rather than the *Applications* folder. You will not be able to install in Applications without admin access and by installing in your folder you can access the app from any Mac you use on campus.

   To start recording open the program or launch from the *Add New* button in My Media.

   ?   *Look for the help button in My Media and the video player for specific support.*
